

REMARKS

Claim 8 has been amended to call for the conversion of linear motion of an operator into rotary motion for generating power.

The cited reference to Henty directly converts linear motion of said operator into electrical energy, as shown in Figure 2A. Therefore, Henty fails to teach the claimed invention.

Claim 16 has been amended to also call for a flywheel and no such flywheel is anywhere taught in Henty.

In view of these remarks, the application should now be in condition for allowance and the Examiner's prompt action in accordance therewith is respectfully requested.

Respectfully submitted,

Date: March 12, 2004
